

Expanding Our Birthing Center with Your Comfort in Mind

When you start your family at Silver Cross, you're in good company! In fact, more families choose our Birthing Center than any other hospital in Will County. That's because we've created a unique place for special arrivals—the **Women and Infant Services Birthing Center**, where you and your family are at the center of everything we do.

From the personal attention of our highly trained staff to the comfort and luxury of our private mother-baby suites, we've designed it with you in mind. Everything's ready for you from the moment you arrive—even complimentary valet parking and shuttle service.

Each of our birthing suites has soft lighting and soothing décor designed to put you at ease with thoughtful touches you'll appreciate. The moment you walk in, you'll feel at home. Every private birthing suite has an easily adjustable labor bed and labor ball available.

3 New Spacious Labor/Delivery/Recovery Rooms

To accommodate the growing number of special deliveries at Silver Cross, we've added 3 spacious LDR rooms to our Women

and Infant Services Birthing Center, bringing our total from 12 to 15. And just like our existing LDR rooms, these beautiful new rooms feature a host of amenities designed for your comfort – **with an important new addition: large immersion tubs for laboring moms.**

Other amenities include:

- Private bathroom
- Sofa sleeper
- Glider chair
- Blanket warmers
- In-room refrigerators
- Flat-screen TV
- And more

Everything for Your Peace of Mind

An obstetrician/gynecologist is in-house 24 hours a day, 7 days a week. Upon your arrival, you'll be "partnered" with a specially trained obstetrical nurse certified in electronic fetal monitoring who'll assist you through delivery. Our new unit also features mother/baby couplet care, which means that the same experienced nurse will care for both mother and baby until it is time to go home.

This ensures continuity in care and improved communication between the patient, family, nursing staff and physicians. At Silver Cross, we also have several certified lactation consultants available for support to new moms who choose to breastfeed their babies. They offer education and support before and after delivery as well as when you return home.
